

$$\begin{array}{c}
 + \quad \mathcal{O}_4 + \quad t_8 F^4 + \\
 \text{---} \quad \text{---}
 \end{array}$$

The diagram illustrates a quantum field theory process. It features two interaction vertices: a dark gray circle on the left and a light gray circle on the right. These vertices are connected by a thick, wavy line, representing a propagator. Each vertex has three external wavy lines extending outwards, indicating incoming or outgoing particles. The diagram is positioned between mathematical terms: \mathcal{O}_4 and $t_8 F^4$ are placed above the vertices, while a plus sign (+) is to the left, a minus sign (---) is to the right, and another plus sign (+) is below the right side.
